

SUMMARY

- QA Automation Tester with 1+ years of experience designing and developing end-to-end automation suites for web and mobile applications using Python, Appium, and Playwright.
- Builds scalable applications and RESTful services using MERN Stack and FastAPI, with experience in CI/CD integration and full-stack development.
- Experienced in cross-platform testing, performance/load validation, and latency testing, ensuring reliable and high-quality delivery across multiple mobile applications.

TECHNICAL SKILLS

- **Frontend Development:** React.js, React Native, JavaScript (ES6+), HTML5, CSS3, UI/UX Design (Figma).
- **Backend Development:** Node.js, Express.js, FastAPI, Python, MySQL, MongoDB, RESTful APIs, WebSockets (Socket.io).
- **Testing & Automation Tools:** Python, Playwright, Selenium, Appium, ChromeDriver, Appium Inspector, Web Automation, Mobile APK Testing, SQL Database Testing, API Testing, Functional Testing, Regression Testing, Performance/Latency Testing, Allure, Grafana, Postman
- **Cloud & DevOps:** CI/CD, AWS SNS, Git, GitHub Actions, Vercel (Frontend Deployment), Render (Backend Deployment)

EXPERIENCE

QA Automation Tester | Krishivaas | Dec 2024 – Present | 1 Year 8 Months

- **Architected and developed** end-to-end **Python + Appium automation frameworks** for four native Android applications, **reducing manual regression effort by 60%.**
- Designed a reusable **Hybrid Automation Framework** using **Page Object Model (POM)** and modular test components to improve **scalability, maintainability, and test execution efficiency.**
- **Developed web automation suites** using **Python and Playwright**, automating critical browser workflows and validating application functionality across **Chrome and other supported browsers.**
- Engineered **network-adaptive performance testing** by simulating **high latency and bandwidth fluctuations**, validating **APK stability and application behavior** across diverse connectivity conditions.
- Executed **functional, regression, integration, and end-to-end testing**, while identifying and documenting critical defects and performing **fix validation and regression testing** to improve release quality.
- Leveraged **Appium Inspector and Grafana** for element debugging and **real-time performance analysis**, while using **Git, pull requests, and collaborative code reviews** within a cross-functional development team.

PROJECTS

Online Learning Platform ([dev-el.co](#)) :

- Architected and launched a live full-stack learning platform offering free technology tracks in AI Engineering, Prompt Engineering, MERN/MEAN Stack, Data Analytics, Android Automation Testing, DSA with Python, Frontend, and Backend Development.
- Built an AI-powered learning experience with an AI Tutor and AI Code Guide that provide contextual guidance, code suggestions, issue identification, fixes, and personalized assistance throughout lessons.
- Designed interactive learning features including visual embeds, quizzes, fill-in-the-blanks, interview questions, and personalized learner profiles for tracking enrolled tracks, progress, completed lessons, and activity.
- Engineered the platform using React/Vite, Node.js, Express.js, MongoDB, and JWT authentication, with the application deployed and hosted on Firebase.

E-Commerce Platform ([shopperzzz.vercel.app](#))

Technologies: React.js, FastAPI, MySQL, React Native, Vercel (Frontend Deployment), and Render (Backend Deployment).

- Architected and developed a multi-tenant SaaS e-commerce platform connecting customers, sellers, logistics, and delivery agents across web and mobile applications.
- Enforced strict Role-Based Access Control (RBAC), tenant isolation, user permissions, and secure session management across all user roles and workflows.
- Built React.js and React Native applications with a scalable FastAPI backend, validating RESTful APIs, WebSockets, and MySQL database integrity for real-time order and inventory management.
- Executed end-to-end functional, regression, and API testing to ensure reliable marketplace operations across cloud environments (Vercel & Render).

Automation Testing Platform — Native Android Application

Technologies: Appium, Python, FastAPI, React.js, MongoDB, Allure Report, Slack, Jira, Page Object Model (POM), Hybrid Automation Framework.

- Designed and developed a web-based automation platform for centralized test creation, execution, monitoring, and reporting across native Android applications.
- Built a reusable Hybrid Automation Framework using Python, Appium, and Page Object Model (POM) to support scalable and maintainable mobile test automation.
- Developed a React.js dashboard with FastAPI and MongoDB for managing test cases, applications, executions, and test results.
- Integrated Allure Reports, Slack, and Jira for detailed test analysis, automated notifications, and defect tracking, streamlining the overall automation workflow.

EDUCATION

- B.TECH / CSE-AIML 2021-2024
Swami Vivekananda Institute of Technology, Hyderabad, Telangana
- DIPLOMA / MECH 2018-2021
VNR Vigana Jyothi Institute of Engineering and Technology, Hyderabad, Telangana
